TIGL Ireland Enterprises Limited

Notes to the Abridged Accounts For the Period Ended 31 December 2014

1. Accounting Policies

The following accounting policies have been applied consistently in dealing with items which are material in relation to the company's financial statements.

1.1 Basis of preparation of financial statements

The financial statements have been prepared on the going concern basis and in accordance with the historic cost convention. The financial reporting framework that has been applied in their preparation is the Companies Act 2014 and Accounting Standards issued by the Financial Reporting Council and promulgated by the Institute of Chartered Accountants in Ireland for periods commencing before 1 January 2015.

The company is exempt from the requirement to prepare group accounts by virtue of Section 297 of the Companies Act 2014. These financial statements therefore present information about the company as an individual undertaking and not about its group.

1.2 Going concern

The financial statements have been prepared on a going concern basis.

The company has completed a 10 year trading forecast, part of which includes a number of key assumptions together with a significant capital expenditure programme. In order for the company to discharge its capital expenditure budget it will require additional funding and financial support from its parent entity.

The financial statements do not include any adjustments that would result if the going concern basis was not appropriate or a withdrawal of the support presently afforded to the company by its parent entity.

1.3 Cash flow

The company meets the size criteria for a medium company set by the Companies Act, 2014 and therefore, in accordance with FRS 1 (revised 1996) Cash Flow Statements, it has prepared a cash flow statement.

1.4 Turnover

Turnover represents net sales to customers and excludes Value Added Tax. Turnover is recognised upon delivery of the goods and services to the customer.

1.5 Intangible fixed assets and amortisation

Goodwill is the difference between amounts paid on the acquisition of a business and the fair value of the identifiable assets and liabilities. It is amortised to the Profit and Loss Account over its estimated economic life.

1.6 Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less depreciation. Depreciation is not charged on freehold land. Depreciation on other tangible fixed assets is provided at rates calculated to write off the cost of those assets, less their estimated residual value, over their expected useful lives on the following bases:

Freehold property	-	4% straight line
Plant and machinery	-	12.5% straight line
Motor vehicles	-	20% straight line
Golf course	-	7% straight line

1.7 Investments

Investments held as fixed assets are shown at cost less provision for impairment.

TIGL Ireland Enterprises Limited

**Notes to the Abridged Accounts
For the Period Ended 31 December 2014**

1. Accounting Policies (continued)

1.8 Leasing and hire purchase

Assets obtained under hire purchase contracts and finance leases are capitalised as tangible fixed assets. Assets acquired by finance lease are depreciated over the shorter of the lease term and their useful lives. Assets acquired by hire purchase are depreciated over their useful lives. Finance leases are those where substantially all of the benefits and risks of ownership are assumed by the company. Obligations under such agreements are included in creditors net of the finance charge allocated to future periods. The finance element of the rental payment is charged to the Profit and Loss Account so as to produce a constant periodic rate of charge on the net obligation outstanding in each period.

1.9 Stocks

Stocks are valued at the lower of cost and net realisable value after making due allowance for obsolete and slow-moving stocks. Cost includes all direct costs and an appropriate proportion of fixed and variable overheads.

1.10 Taxation

The yearly charge for taxation is based on the profit for the year and is calculated with reference to the tax rates applying at the balance sheet date. Deferred taxation is calculated on the differences between the company's taxable profits and the results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements. Full provision for deferred tax assets and liabilities is provided at current tax rates on differences that arise between the recognition of gains and losses in the financial statements and their recognition in the tax computation. Deferred tax assets are recognised to the extent that they are recoverable, that is, on the basis of all available evidence, it is more likely than not that there will be suitable tax profits from which the future reversal of the underlying timing differences can be deducted. Any assets and liabilities recognised have not been discounted.

1.11 Foreign currencies

Monetary assets and liabilities denominated in foreign currencies are translated into euros at rates of exchange ruling at the balance sheet date.

Transactions in foreign currencies are translated into euros at the rate ruling on the date of the transaction.

Exchange gains and losses are recognised in the Profit and Loss Account.

2. Operating loss

The operating loss is stated after charging:
